

Sometimes you just need higher print heights. The NJ-5000 is equipped with 2x 1 inch TIJ ink cartridges. This gives combined print heights from 2 to 50 mm high!

The computer unit allows easy and convenient creation and management of print data directly at the point of use via a touch screen and controls the output at the print head according to the set production speeds (up to 70m per minute). The internal memory can store up to 1,000 messages, each up to 2,000 characters long.

## Technical data NasaJet® NJ-5000

	CPU	Quad Core 1.4GHz	Ink type	Water / Solvent
	Touchscreen	7" (17,7cm)	Print distance	0.07-0.2" (2-5 mm)
	Languages	DE/EN/ZH/ES/FR	Power supply	220V±20% AC
	Print height	0.07-0.5" (2-12,7 mm)	Input / Output	USB / ext. light sensor
	Resolution	300dpi maximum	Temperature	32-100°F (0-38°C)
	Print content	Text / Number / Symbol / QR- & barcode / Date / dyn. data / variable QR-codes / GS1.128		

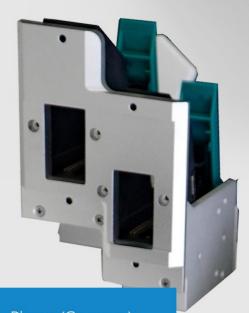

## **Advantages**

Make your everyday work easier and save time and money!

The computer unit allows easy and convenient creation and management of print data directly at the point of use via a touch screen and controls the output at the print head according to the set production speeds (up to 60m per minute).

## **Applications**

Thanks to the use of a wide range of inks, the application possibilities are almost unlimited. Print your data and information on cardboard, wood, plastic, metal, concrete, stone, polystyrene, rubber, ceramics, textiles or even organic substrates.
